Farben liegen im Rahmen branchenüblicher Abweichungen. Bei Leucht- bzw. Neonfarben* ist eine bessere Lichtechtheit als Note 4 technisch nicht darstellbar.

Colors subject to usual trade standards. In the case of fluorescent colors and neon colors* it is technically impossible to attain a fastness to light better than grade 4.

Colori nell ambito delle tolleranze consuete del settore. Con colori fluorescenti al neon* non si può ottenere tecnicamente una resistenza alla luce che superi il valore 4.

AeroStitch

 AeroStitch ist wegen der hohen Wasch- und Lichtechtheit das ideale Stickgarn für Outdoor Bekleidung sowie für stark beanspruchte Textilien, die häufig gewaschen werden wie Sport-, Kinder-, Arbeitskleidung, Hotel- und Gastronomie Wäsche.

Wegen der hohen Chlorechtheit ist AeroStitch besonders geeignet für Stone-wash-Behandlung.

Eine spezielle Spinnkonstruktion garantiert exzellente Verarbeitungseigenschaften ohne Schlaufenbildung oder Fadenbruch selbst bei hohen Maschinengeschwindigkeiten. Auch bei der Herstellung von aufwändigen Stickdesigns mit komplizierten Stichfolgen zeigt AeroStitch außergewöhnlich gute Laufeigenschaften.

 Due it is resistance to washing and light AeroStitch is the perfect embroidery thread for outdoor wear and frequent or heavy duty wash fabrics such as jeans, sportswear, children's wear, workwear, hotel and catering items.

Due to its resistance to chlorine it is especially suitable for stonewash items.

A special spinning construction that guarantees excellent processing characteristics without loop formation or thread breakage even when machine runs at high speed. When producing elaborate embroidery designs with complicated stitch sequences AeroStitch also has exceptionally good running characteristics.

 Gracias a su alta resistencia al lavado y a la luz, AeroStitch es el hilo de bordar ideal para las prendas de uso exterior, así como para todos aquellos tejidos sometidos a un gran uso y a lavados frecuentes, tales como las prendas deportivas, la ropa infantil, la ropa de trabajo y los textiles para la hostelería y la restauración.

Gracias a su alta resistencia al cloro, AeroStitch también resulta especialmente adecuado para los procesos de lavado a la piedra.

Su especial estructura garantiza unas excelentes cualidades de bordado y evita la formación de lazos o las roturas de hilo, incluso a altas velocidades. También en la elaboración de bordados con diseños complejos y secuencias difíciles, el hilo AeroStitch demuestra tener unas excelentes capacidades de pasada.

 AeroStitch yüksek yıkamaya ve işiğa karşı dayanıklılığı sayesinde açık hava giysileri için olduğu gibi, dayanıklı kumaşa sahip spor, çocuk, iş, hotel ve otelcilik giysileri gibi sık sık yıkanması gereken giysiler için de en ideal nakış ipliğidir.

Yüksek oranda klor içerdiğinden dolayı AeroStitch özellikle taşılama için uygundur.

Özel bir dokuma tasarımı en mükemmel şekilde işlenmesine izin verir ve en yüksek makine hızlarında bile düğüm oluşmasına ve iplik kopmasına neden olmaz. En kapsamlı ve komplike iğne batışı gerektiren işleme desenlerde bile AeroStitch son derece mükemmel hareket özellikleri gösterir.

AeroStitch

 Благодаря высокому показателю качества окрашивания нити (нитки не линяют, не выгорают) AeroStitch - идеальные вышивальные нитки для текстильных изделий, подвергающихся частой стирке, таких как спортивные изделия, рабочая одежда, бельё для гостиниц и ресторанов.

Благодаря устойчивости к хлору AeroStitch отлично подходит для эффекта ватрёных джинс.

Специальная конструкция нити гарантирует отличное качество переработки без образования узелков или порыва нити даже при очень больших скоростях швейных и вышивальных машин. При изготовлении сложных вышивальных дизайнов с многослойными структурами AeroStitch имеет прекрасные показатели переработки.

 L'elevata resistenza alla luce e al lavaggio rendono AeroStitch il filato da ricamo ideale per l'abbigliamento outdoor nonché per prodotti tessili che vengono lavati frequentemente, quali abbigliamento sportivo, da bambino, da lavoro ma anche biancheria di alberghi e ristoranti.

Grazie all'elevata resistenza al cloro, AeroStitch è particolarmente adatto al trattamento stone wash.

Una struttura speciale garantisce proprietà di lavorazione eccellenti senza la formazione di nodi o rotture anche in caso di velocità elevate del macchinario. AeroStitch mostra inoltre un'eccellente scorrevolezza anche nella realizzazione di ricami impegnativi con sequenze di punti complicate.

 Graças à sua elevada resistência à lavagem e à luz, AeroStitch é o fio para bordar ideal para vestuário outdoor, bem como para têxteis adequados a actividades exigentes que impliquem lavagem frequente, como roupa de desporto, de criança, de trabalho, de hotelaria e de cozinha.

Dado o elevado teor de cloro sólido, o AeroStitch é bastante adequado para a lavagem Stone Wash.

Uma construção especial do fio garante excelentes propriedades de processamento sem a formação de laçadas ou ruturas de fios mesmo a elevadas velocidades das máquinas. O AeroStitch também é dotado de extraordinárias propriedades de processamento no fabrico de desenhos de bordados dispendiosos com pontos complexos.
